## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 23 March 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Kollep et al. '332.

There is disclosed in Kollep a closing mechanism for a brewing device, comprising: a fixed lower part 1; an upper rotatable part 2; a clamping lever 6, 7 including a first member 6 pivotally connected at a first pivot 11 to the upper part and a second member 7 having a first end pivotable about a second pivot 12, an end of the first member and a second end of the second member being pivotably connected together at a third pivot 13. In regards to claim 2 the first and second members of the lever appear to have a form of screw or bolt (hook) which engages an opening (detent) in the upper and lower parts at the pivot locations. A view of figures 1-8 shows a perspective of the third pivot position in respect to a fixed datum line joining the first and second pivot points.

### ***Allowable Subject Matter***

Claims 8-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-20 are allowed.

### ***Response to Arguments***

Applicant's arguments filed 23 March 2006 have been fully considered but they are not persuasive. Applicant argues that the Kollep '332 reference fails to disclose a closing lever having first and second positions of stability. Additionally, applicant argues that the reference fails to disclose a hook and detent arrangement.

The two positions of stability in the Kollep reference can be defined by the closed position and the open position. The clamp allows the upper rotatable part to be held in the open position without user handling. Additionally, in regards to the positions of stability, such are not defined in terms of structure. As recited in the claims the positions appear to be desired results for the clamping member. The structural limitations of the claims have been met by the Kollep reference. In regards to the use of a hook member on the clamping member for engaging a detent, such an arrangement or its equivalent was described in the rejection above.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
